~~【図4】~~

Fig. 4

~~【図5】~~ Fig. 5

~~【図6】~~ Fig. 6

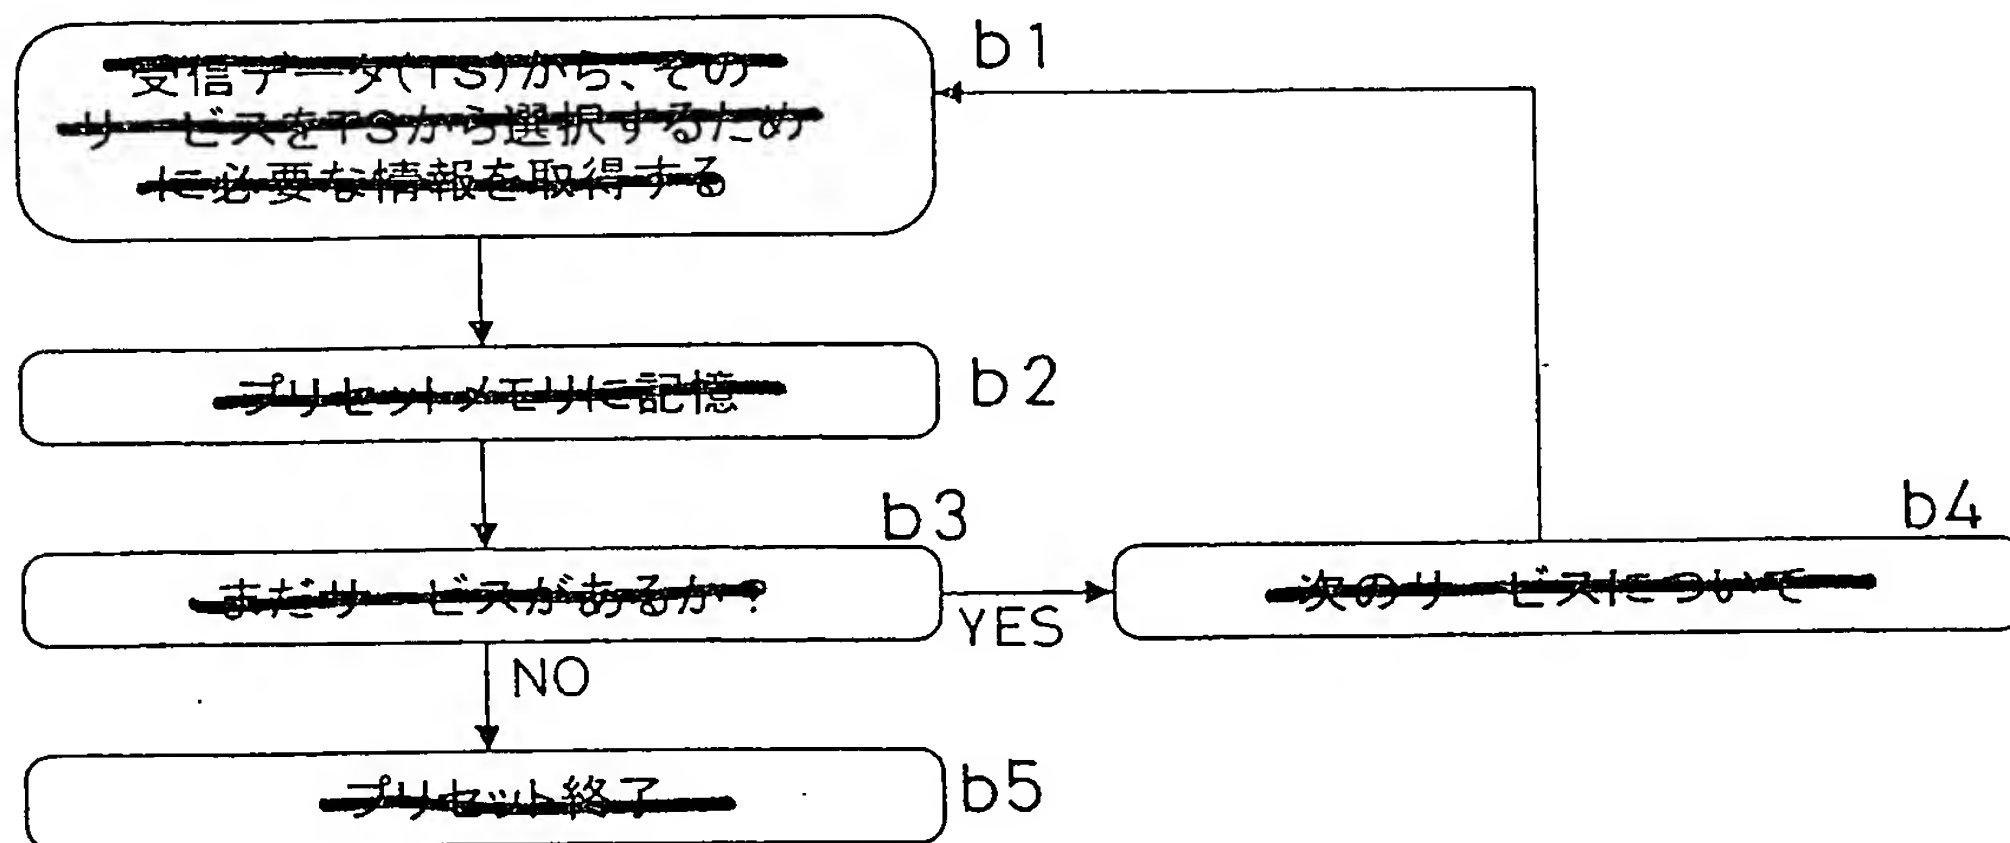

Fig. 5

- a1 Store a service contained in TS
- a2 Is there any TS not stored?
- a3 Receive TS at subsequent frequency.
- a4 End of storing

Fig. 6

- b1 acquire service information of each channel from received
data (TS)
- b2 Store in memory.
- b3 Does any service remain?
- b4 For subsequent service
- b5 End of storing

~~図7~~ Fig. 7

Fig. 7

c1 user designates a desired program (service)
c2 receive TS containing the designated program (service)
based on service information of the designated program
(service).
c3 select the designated program (service) from TS to output
content of it
c4 end

~~図8~~

Fig. 8

Fig. 8

- d1 does user conduct a storing operation?
- d2 detect which one of pushbuttons F1 to F8 is operated
- d3 store a program, which is being received, into a memory
corresponding to the pressed pushbutton

【図9】

Fig. 9

Fig. 9

e1 acquire class information of a certain service from
received data (TS)

e2 television broadcasting service?

e3 acquire information of subsequent service

e4 acquire information required to select service from TS

e5 Is there any service?

e6 store into memory.

~~図10~~ Fig. 10

~~図11~~

Fig. 11

Fig. 11

- g1 acquire class information of service from received data
 (TS)
- g2 temporary television service?
- g3 acquire subsequent service information
- g4 acquire information required to select service from TS.
- g5 Is there any service?
- g6 store into memory.

Fig. 12

- h1 acquire class information of service from received data
 (TS)
- h2 temporary television service?
- h3 is user's setting either "store" or "not store"?
- h4 acquire subsequent service information.
- h5 acquire information required to select the service from
 TS
- h6 Is there any service?
- h7 store into memory.

~~(図13)~~

Fig. 13

Fig. 13

j1 acquire temporary service information
j2 Is program being broadcast at present?
j3 Is there another temporary service?
J4 delete service from memory
j5 end
j6 after elapse of a predetermined time
